CHATGPT / HUMAN REVIEW GOAL

Compare what is visible in the captured frames with the authored Timeline cues below.

Do not assume that an authored cue happened merely because it exists in the Timeline.

CHECKLIST

1. Does shot progression visually match the intended authored events and active clips?
2. Are emotional close-ups/reaction cutaways visible at the intended moments?
3. Are moving actors visibly animated and staged on the correct ground/space plane?
4. Are ships, missiles, impacts and other VFX visible, readable and correctly scaled?
5. Are there blank, frozen, overlapping, cropped, duplicated or badly framed shots?
6. Flag every place where the screenshot contradicts the authored plan.

Evidence note: this PDF is visual Editor-Timeline evidence, not runtime physics proof.
